His gospel of doing the scorched their fingers on this issue work on the day is one which he because they cannot deny that practices as well as preaches, and Baruch and Baker and other officfor that reason he is not wasting ers of their high command started the agitation for the cancellation of debts, which was the first step toward the destruction of the prothe wisest of forecasters is in tective principle which has safe-danger of sunning amuch if the guarded American Industrial life

Liouse Control

Washington, Nov. 5.-The loss of thirteen republican congress, men, while it reduces the control of the house 30 members, has little significance in forecasting the result of the presidential election Elmer Leroy Lehnhardt, 53, of 1928. The jubil ant democrats will enjoy only tem porary consolation out of Tuesday's election, the result of which was due to local conditions.

The Coolidge supporters have little fear of the predicted "avalanche" which the democrats have forecasted for 1928.

The people want a continuance of good times, which are due to the republican administration, safe and sane.

Tom Marks Receives Patent Credentials

Tom Mark, the barber at 214 San Pablo, has received his credendentials from the patent office, ion dollars, and will be ready for invention, which is a simple little occupancy by Jan. 1, 1928, states thing which no inventor has thought of. It is an adjustable handle to the standard milk bottle, Richmond Boy Asks with a lid similar to the molasses pitcher. The novelty is made of aluminum, and is sanitary and convenient in every detail, and is made as so as to be quickly adjust-

Mark has been offered a small fortune for an inte rest in his practical and useful invention.

Americans Not Prone to Abbreviated Terms

Anacione leigurelinas characterizes even the speech of the American. It is sometimes supposed, quite wrongly, that in this he inclines to slang. On the contrary, he has time to eachew contraditions. He talks "automobiles," while the poor Englishman, flustered by the struggle to earn a living in postwar Europe has only time for "car" "Elevator" takes the place of "lift," and

the humble "tram" is elongated into a "trolley car." He even clings to the old-fashioned "gotten" for "got," regardless of the fate which vertook his countryman in England who, anxious to spend an eve ning with his loved one at the theater, telegraphed that he had "got-ten tickets". When she appeared to the renderyous with cital friends and relations he must have regret-Reduced to 30 ted the employment of an archate diction, the only meaning of which, to an English telegraph clerk, was that the sender had "got ten tickets' for the entertainment in question. A curious illustration of the ceremonial formality of American modes of speech may be noted in the courts, where the advent of a judge or judges, heralded in brusque and businesslike Britain by a curt

or a no less impressive equivalent .-

This is excellent advice as far as the injunction not to be sarcastic to ehildren goes, but poor advice if it bids you be sarcastic to others.

Most clever persons are endowed with the ability to use sarcasm, but wise persons use it in ordinary conversation as they would use firearm only when other means of self-defense have falled

Almost all great preachers and teachers have indulged in sarcasm. From the words of Christ you will find some of the most poignant bits of sarcasm. Buddha and Mohamet and the Hebrew prophets were occasionally sarcastic-but it was only when they were hard pressed by those who opposed them, never when they wished to give instruction or correction to simple folk or those whose allegiance they already pos-

There is really no place for sarcasm in ordinary social conversa-tion. To use it would be like using an unguarded foil in a fencing bout.

Improved Vacuum Tube A new vacuum tube for radio re-seiving sets has been invented in France having two filaments. One is used at a time, but when a filament burns out the tube is so constructed that the other tube can be "cut in" on the "A" battery circuit, and the set continues to oper-

Plan to Get Power From African River

A French engineer has a schem which in all probability will be put into effect; starting in a rather modest way and finally working up to a great industrial proposition. nothing less than putting the great Congo river to work.

It is suggested to build a series of seven dams between Leopold and the mouth of the river which will not only be the means of generating power but of making the river navgable by means of locks and canals. The resources of the country are great, but the transportation facilities are nil. Goods to and from interior points must be carried in small parcels at present from the of the river to the inland points, which makes the operation

chesp.

The idea of the originator of the plan, Colonel Van Beuren, is to construct but one dam at a time in order to avoid burdening public financial resources. He estimates each dam will necessitate the outlay of about 100,000,000 francs. Construction of the first dam, however, would be an appreciable industrial seet, giving 350,000 horse power. -Chicago Journal.

Bus Line Favored by Substantial Majority Is Given Charter Plan

Oakland, Nov. 5 .- One of the surprises of Tuesday's election was the defeat of Sheriff Frank Barnet. whom it was conceded by many was a sure winner.

The Piedmont police chief and the incumbent ran neck and neck The improvement of San Pablo in the early counting of votes, but distanced his competitor in the final count, by about 12 000 votes. For State Senator, Incumbent

Hurley won over Frank V. Cornish by 9322 to 6140. Henry C. Cloudman, incumbent ssemblyman, 40th district, was re-elected, receiving several thousand votes more than his comper-

itor, John O. Davies. The county charter proposition won, 38,679 to 30,552.

Justice of the Peace L. F. Grove of San Pablo was re-elected Tues-day, defeating E. H. Woedfeldt, written in candidate, 288 to 164.

Constable George Conlon, Bl Cerrito, was re-elected over William Brown, the returns show.

THE WORLD'S **GREAT EVENTS**

ALBERT PAYSON TERHUNE

Joan of Arc THE great presence-chamber of the French court was crowded to the doors. On a dafs at the upper end of the room sat a gorgeously attred man, surrounded by flattering courtiers.

Into that brilliant assemblage a poo peasant girl was ushered. Her tanned face was homely, but lighted by unusually large, melancholy eyes, She was Joan, the peasant's daughte

of Domremy.

Her eyes swept the cay court, rested indifferently on the gaudy form in
the chair of state, then passed on to a the chair of state, then passed on to a far corner of the room, where she singled out a plainly dressed man who stood unnoticed in a lesser group of courtiers. Going up to this man, she knelt before him, saying:

"You are Charles, the dauphin(crown prince) of France!"

"You are Charges, the usualization (crown prince) of France!"

A murmur of amazement ran through the listening crowd. The dauphin raised the peasant girl to her feet. The smile of derision that had curied his lips gave place to a look of awe. Joan of Arc's career had hearth. had begun.

France and England had for cer France and England had for centuries been bitter foes. They were forever at war with each other. (These wars endured at intervals until the battle of Waterloo, in 1815.) France had been repeatedly beaten by the better-disciplined islanders. Invasion after invasion on the part of the English had turn away more and more French tertorn away more and more French ter ritory and had annexed it to Eng land. Edward III had several times invaded France, and his son, "the Black prince," in the battles of Crecy and of Poltiers (1336 and 1356) had wrecked France's military power. The Black prince has come down

through history as the very flower of

chivalry; whereas, as a matter of fact, he was a brutal freebooter. Later, Henry V of England had fu subdued France, until, early in the Fifteenth century, England had conquered all the country north of the River Loire, and the infant son of V was crowned not only king of England but of France as well— France, lying helpless, almost pas-sive, in the grip of her British masters. Charles, son of the French king and rightful heir to the French throne, should have been crowned on his father's death, but he had no genius or ambition and was content to spend his time in idleness and dis

to spend his time in identees and dis-sipation, uncrowned, while his king dom slipped away from his nerveless hands.

Affairs had reached this point when Joan of Arc appeared. She had passed her childhood in the forest of Domremy, at the edge of the prov-ince of Lorraine, where she tended her father's flocks, excelled at house wifely arts and repelled all offers of love. She could neither read nor write. But she had heard of the prophecy made of old by the magician, Merlin, that France, in the hour of direst need, should be saved by a maiden. Tradition had added that the maiden should come from Domremy Joan brooded over this prophecy in her long hours of solitude in fields and woods until she hypnotized into the belief that she heard divine voices telling her she was the Holy Maid destined to rescue her country

At this functure the English captured Orleans, the way to all south-ern France. Joan declared that the "voices" bade her to wrest Orleans from the invader and to crown Charles at Reims. With this double aim in view, and backed by the clamor of popular feeling, she secured an in-terview with Charles. To deceive her, he decked out a courtier in his royal robes, and himself stood, disguised, in a remote corner. Joan at once saw through the imposition. So impress was Charles that he gave her an army of about 4,500 men and sent he

against Orleans. She had no military knowledge, no education of any sort. Yet she had absolute faith in her own inspiration, and she inspired her soldiers with the same belief. Incidentally, she worked strongly upon the superstitious fears of the English. Clad in mail and car-rying a sacred banner, she rode at the nead of her fanatical army, captured after battle and drove them helter-skelter beyond the Loire. Then she returned and assisted at Charles' cor-

nation at Reims.

Her double mission thus accomplished, she begged leave to go back to her flocks and the quiet life of her village. But Charles would not hear of it. He ennobled her and her famthe English. In vain she pleaded that she had no further divine tall. Charles relied on the fansite enthusiasip of sage and do interfer with that is a relied on the fanatic enthusiasip of her soldiers to sweep all before them. So she obeyed. But she was hence-forth no more than a mere woman. On September 8, 1429, she attacked Paris, but was Shalem back and wounded. Her inch- og dyine power,—was gobe. Soon afterward she was captured. Charles, who owed her his kingdom, made ho effort to ransoll of tesche her.

The finglish tried her as a sorceeps and a heretic. Aithough no crime or deceit could be proven against her, they pronounced her fullty, and on May 30, 1431, burned her at the stake.

Thus died Joan of Are, holy martymald, and the bravest, purest patriot the world has ever known.

MOTHER AVENGES DEATH OF HER SON

Kills Man Supposed to Have Slain Offspring.

New York .-- A vendetta, relentlessly pursued by an Italian mother for six years, ended when she shot and killed the man she believed responsible for the fatal shooting of her only son.

As Andrew Ficarella, the victim, ap-Goerck streets, a few doors from the spot where he is said to have killed the young man, Mrs. Josephine Canenia, mother of the slain youth, hurried up behind him, She gripped the collar of his cost and wilcond. collar of his coat and whipped a pistol from her dress. Before he could turn she fired a shot through his neck. Four more bullets followed in quick succession. One struck him is the head, the others going wild. The enraged mather threw her pis-

tol aside as Ficarella fell. Bending her umbrelle over her knee she hurled it at the dying man's face in a final gesture of fury. Patrolman John O'Donnell ran up and arrested her, "Every one in the neighborhood knows that man shot my son," she said. "He was my only son, and a

very good boy to me. ectives learned that the pisto she used had been sent to her from Italy. She told the police that she had left her husband because he would not avenge the death of their

Mother Kills Children,

Then Commits Suicide London.-To keep secret the birth of a son two years after she and her husband separated, Mrs. John Hase of London killed her three young children. Then, fearing arrest, she committed spicide

The bodies of the four, hanging on pegs in the wall, were found in a back room of the Hase home by police. The

secret son was one of the three chil-dren the mother killed.

John Hase, the husband, told police that he and his wife separated eight years ago and that he did not know of the birth of the youngest child. This year for the first time, he said, he decided to take advantage of court order permitting him to see his children, and had sent for them to visit him.

Mrs. Hase, it is believed, killed the two older children for fear that they would tell their father of the third child. Documents found in the house showed that the child was born two years after the couple parted.

One of three letters wfitten by Mrs

Hase before she killed her children and herself explained the tragedy. "Death alone can seal my secret," she wrote. "May God forgive me for

SEES INCREASE IN SUN'S VIOLET RAYS

Scientist Says 1927 Will Be Great Year for Tan.

Pasadena, Calif.—The ultra-violet rays of the sun, the part of sunlight that causes sunburn and cures some diseases, are more copious as the spots on the sun grow more numerous, and there are indications that when the eleventh-year maximum of spots is reached, within the next year or so, the sun will give off about two and a half times as much ultra-violet light as it did in 1923 when the spots were

least numerous.

This is the conclusion of Dr. Edison
Pettit of the Mount Wilson observatory here, who is conducting a study of this invisible but important part

the fact that the ultra-violet radiation passes through a thin layer of sliver, but not of gold, while a similar layer of gold transmits visible green light. As glass is opaque to the ultra-violet, two lenses of quarts are used, one of which is silvered, and the other gilded. the sun on a vacuum thermocouple, which gives an electric current when

light falls on it.

This current is measured with a galvanometer, and from it can be de-termined the intensity of the ultraviolet or the green radiation, depend-ing on whether the silvered or gilded lens is used. As the intensity of the green light remains scatterly constant, it is used as a standard with

which to compare the ultra-violet.

Doctor Pettit finds that when he plots the variation of the ultra-violet light, and the numbers of spots visible on the surface of the sun, the two curves show close agreement. Since October, 1925, he says, the ultra-vio let light has been about 70 per cent greater than it was in June, 1924. when he began his researches.

As the spots are apparently still on the increase, he anticipates that the intensity of the ultra-violet at the minimum in the summer of 1923 as a first magnitude star is brighter than one of second magnitude, or about two

and a half times as great.

A supplemetary research of Doctor Pettit's has shown that this change probably takes place in the sun itself and is not due to variations in the amount of ozone in the air, as has been suggested. "This experiment shows" save Doctor Pettit, "that if the atmospheric ozone were increased 100 per cent, the ratio of ultra-viole per cent and if all the atmospheric zone were eliminated the ratio rould increase only 3 per cent.

New Black Walnut Found

Splits Like English Type New York.—A native American black walnut, whose nuts split like those of the so-called English walnut, allowing the meat to come out in two even halves, is the promising find of Prof. J. Russell Smith of the Colum-bia university school of business, who reports that he has several grafted specimens growing on his farm near Round Hill, Va. The hard, woody partitions in the shell that make so much work for the nut-pick in ordinary black wall uts are lacking in the new variety, which probably arose as

a chance mutant or "sport" in the nat-ural timber.

It is pointed out that native walnut promise for the development of an American nut-growing industry. "English" walnuts, which in point of fact came to this country from Spain and southern France, are too tender to grow profitably north of California, and other Southern states s the pative black walnu thrives in the woods clear up to the

Canadian border and beyond. The Northern Nut Growers' association, of which Professor Smith is member, is offering a prize of \$50 for the discovery of the best black walnut trees in America.

FINDS OCEAN FLOOR SHIFTED OFF ALASKA

Sponges and Coral Discovered in Warm Current

Seattle, Wash.-Discovery of tropical sponges and coral growths on the ocean floor off the southeastern Alaska coast has convinced Capt. Charles S Huckins, veteran deep-sea diver of Seattle, that the climate of Alaska has undergone a marked change with Captain Huckins' theory is that

there has been a violent disturbance in the Gulf of Alaska, probably of a volcanic nature—possibly caused by series of earthquake shocks—whic has diverted warm currents of water into new channels. Prior to this year Captain Huckin wore thick mittens and heavy woole clothing under his diving suit while exploring that mysterious world below the surface of the sea. In the season

just closed he wore much lighter clothing and discarded mittens alto-Means Record Mild Winter The increase in the temperature of the water set Captain Huckins to thinking. Then came the discovery of the sponges and coral and the con-clusion that southeastern Alaska's coastline, despite its northern latitude, robably will enjoy the mildest winter

a its history.

Every summer Captain Huckins goes north to survey underwater lo-cations for the big wire-walled traps in which the fish canneries capture salmon. He also repairs the breaks in these traps. He works in depths ranging from 70 to 120 feet day after day and has an opportunity to ex-

s given to few men. It was in Yes bay, not far from Ketchikan, center of the fishing in-dustry, that Captain Huckins first saw Plodding along in his lead en-soled diving suit, 100 feet below the surface, he saw a "beautiful red

"The color of the marine plant first attracted my attention," said Captain Huckins. "From a stalk about three Huckins. "From a stalk about three and a half feet high and resembling Mexican cactus in some respects blood-red fingerlike appendages were growing. I picked several of them to show to my companions on the sur face. Upon close examination they looked so much like sponges that I brought some down to Seattle. Here I learned that indeed they were

"I was not so fortunate in collecting specimens of what I believed was coral. The growth crumbled in my hand and I was unable to bring any

mand and I was unable to sing any material amount to the surface. Next season I am going to try again." Captain Huckins had some stirring experiences in northern waters last summer. One day—minus the knife he usually carried to protect himself—he came face to face with a giant wolf fish, more than eight feet long and with rows of teeth like those of the animal from which he obtains his

Wolf Fish Dangerous Foe. Wolf Fish Dangerous Foe. "The wolf fish is a hideous-looking creature," said Captain Huckins. "He coils up like a snake and has a fin along his back about six feet long, on which he could easily impale a man. This was the first one I had ever

seen.
"I looked at the wolf fish and he looked at me. If he had attacked me I never would have seen the surface again. He remained motionless, foragain. He remained motionless, for-tunately, and I slowly backed away, and then promptly gave the signs which brought me to the surface and

They will act as solicitors in the Teath Annual Roll Call for members, which the Red Cross will conduct from November 11 to 25.

Nearly 80,896 disabled veterans are assisted by the American Red Cross on an everage every month. Care of the disabled veteran is a foremost responsibility of the Red Cross, in which the people can share by joining its ranks, during the Tenth Annual Reli Call, November 11 to 25.

The American Red Cross is the official agency of the United States for disaster relief at home or abroad. Join during the Tenth Annual Roll Call from November 11 to 25 and share its services.

FLORIDA LEADS RELIEF RECORDS

Heads Major Disasters of 1926. Red Cross Active in 62 Emergencies in Year.

ALSO SERVES FOREIGN LANDS

Preparedness to Cope with Great Disturbances Gives Good Results in Action.

Facing one of the largest rehabilitation efforts of its whole history, as a result of the Florida hurricane, the American Red Cross already had behind it a record of service in 62 dis-asters at home, up to the close of the fiscal year, June 30, 1926. When the hurricane struck Florida

with such devastation and loss of life. the Red Cross National Headquarters was just congratulating itself that a year had passed without a major dis-aster within the borders of the coun-try. The destruction in Piorida has been-tentatively estimated by Direc-tor of Disaster Relief Henry L. Baker, of the American Red Cross, in term of relief work ahead of the organiza-tion. This takes into account all suf-ferers who must be cared for.

ferers who must be cared for.

Careful surveys by experienced authorities place the injured at 4,000, exclusive of the stricken Gulf Coast cities of Moorehaven and Clewiston. Of the 1,200 injured sent to Miam hospitals, 500 were suffering with ma-jor fractures. In two other east coast communities the injured numbered nearly 1,000. The homeless were con servatively estimated at 50 000 Quel figures exetch only vaguely the human and material problem which the American Red Cross is still doing its utmost to solve.

For comparison the other outstanding recent disaster, the Midwest tornado of March 18, 1925, can be described in more detail. In that catas trophe the final check showed \$00 dead, 3,000 injured and 6,347 families of approximately 30,000 men, women and children rendered homeless. The final relief operations of the Red Cross were brought to a close March history of the nation.

18, 1926, exactly a year from the day the tornado struck five states.

General Apathy was

So terrible did the death and destruction impress itself on the experienced Red Cross forces rushed into Florida that Chairman John Barion
Payne did not hesitate to call for a
relief fund from the whole country of
\$5,000,000. The Red Cross conesn

California is still well entrenched
in the republican column according trated every resource in trained per

sonnel on the stricken region.

The New Jersey munitions explosion, in July, while terrible as a spectacle, could not compare with either tacle, could not compare with either of these other two disasters in final destructiveness. It gave the Red Cross an opportunity for service in which Red Cross nurses treated 85 injured. and during the height of the eme gency fed between 700 and 800 peple driven from their homes. More than 400 cases were registered with the Red Cross after the explosions for assistance in regaining their hold on life through rehabilitation work. This latter is a regular part of the Red Cross relief operations in all disasters, and means a task continued long after the country has ceased to think of the occurrence itself.

The year has seen a new measure of disaster relief preparedness inaugurated by the Red Cross, under which a trained reserve of medical and other relief experts is constantly cn call for any service. This prepar-edness justified itself in both the New Jersey explosion, and in the Florida hurricane. In the latter the Red Cross had at call more than 300 experienced disaster workers with a network of prepared Chapters all over the country. This preparedness, constantly demonstrated, is cited as material assurance that the country is better protected today than ever before from the suffering such misfortunes engen

Bad as were domestic disasters in Bad as were domestic disasters in both the last fiscal year and recent months, some of those abroad in the same time have been comparable, es-pecially a flood in Mexico. Altogether the American Red Cross served in the name of the American p

The Tenth Annual Roll Call for membership to maintain such activi-ties will be held from November 11 to 25, and ie an opportunity for all to enroll themselves in the American

Good Men For Public Service Disinclination of able men of affairs to accept public office is one of the outstanding misfortunes of present day politics. More strong men are needed, yet every day one, or more, is found putting aside opportunities when he could bring his experience and his talents into play for the public service. It is no less regrettable to find men retiring from office where they have rendered honest service because they considered the time hopeless for the work that needs to be done for the good of the country.

SUMMONS

In the Superior Court of the State of alifornia, in and for the County of Contra Costa.
No. 12738.

Monuel Pereria Rose, formerly known as Manuel Rosa Pereria, plaintiff vs. Madeline Moltoza, Manuel Miguel Bettencourt, Joseph A. Mello, siso known as J.A. Mello, Joseph Dutra, also known as Jose Dutra, Frank Dutra, Rernice I. Dutra, Augustine Dutra, Rernice I. Dutra, Augustine Dutra, Bernice I. Dutra, Delphina Dutra as administratrix of the estate of John Dutra, deceased, John Doe, Jane Doe, and the Doe-Roe Company, a corporation, and siso all other persons unknown claiming any right, title, estate, lien or interest in or to the real property described in the complaint adverse to plainstiff's ownership or any cloud upon plainstiff's ownership or any cloud upon plainstiff's ownership or any cloud upon plainstiff's title thereto, defendants.

Action brought in the Superior Court of the state of California, in and for the County of Contra Costa, and the complaint filed in said County of Contra Costa, in the office of the Clerk of said Superior Costa. C. D. Horner, attorney for Plaintiff, Richmond, California.

The People of the State of California

for Plaintiff, Richmond. California.

The People of the State of California.

In the People of the State of California and State of California and State of California Cal

tiff's title thereto, defendants.

You are hereby required to appear in an action brought against you by the above named plaintiff in the Superior Court of the State of California, in and for the County of Conira Costa, and to answer the complaint filed therein, with rescue of the Wright act, and blocked the repeal of the law by over 55,000 majority. Comparing the vote of the bay cities with the southern vote, some suggestive comment is in order.

Calvin Coolidge is a wise New Englander. He forecasted just

Calvin Coolidge is a wise New

Englander. He forecasted just what happened—local discontent and local conditions did it. In 1928 and local conditions did it. In 1928 Coolidge will receive the largest majority of any president in the history of the nation.

General Apathy was not so apparent as forecasted. The vote was up to standard.

California is still well entrenched in the republican column according to figures.

Now that the election is past history, remember taxes are delinquent December 6.

After that prepare for Santa Claus, who has some announcements to make.

Or will apply to the court for any other relief demanded in the complaint.

Said action is brought to compel the loss, Manuel Miguel Bettencourt, Joseph A. Mello also known as Joseph Dutra, Prank Dutra, Margaret Dutra, Prank Dutra, Margaret Dutra, Prank Dutra, Margaret Dutra, Prank Dutra, Margaret Dutra, Prank Dutra, deceased, John Doe, Jane Doe and the Doe-Roe Company, a corporation, and also all other persons unknown claiming any right, title, estate, lien or interest in or to the real property described in the county of the

Portion of Lot 174 as designated on the map entitled "Map of the San Pablo Rancho, accompanying and forming a part of the mal report of the Kelerees in Partition," which map was filed in the office of the Kecoreler of the county of Contra Costa, State of California, on March 1. 1894 and particular y described as follows:

follows:

Beginning at a stake on the North line of Road No. 2 or Alvarado Street from which a granite post set for Southwest corser of Lot 170 on north line of said street or road bears South 48' Hast distant 14.75 chains, thence according' to the true meridian as follows: Along the Northerly line of said Road No. 2 or Alvarado Street North 48' West 1.015 chains to stake; thence from said stake North 42' Chains and 53 links to stake, thence South 48' Rast 1.015 chains to stake, thence South 48' Rast 1.015 chains to stake and thence South 42' West 2 chains and 53 links to point of beginning.

Recenting Thereform the meter sinks

chains and 53 links to point of ginning.

Excepting Therefrom, the water rights conveyed in the deed from Manuel Rose Pereira to the Peoples Water Company a corporation, dated November 6, 1909, and recorded January 15, 1910 in Volume 5 of Miscellaneous records, at page 77. Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California this 22nd day of July, 1926.

J. H. WELLS, [9BAL] W. T. POSSEN, Deputy Clerk.
